## Handcrafted Copper Kitchen Apron Sinks

Artisan Manufacturing is pleased to announce their new handcrafted, designer-inspired Copper Kitchen Sink Collection. These new designer and classic, apron front copper sinks are the ultimate in quality and craftsmanship.

The decorative pattern crafted into the front apron of the single bowl sink (top photo) is second to none. The 10" deep hand-tooled interior creates a stunning finish. The return reveal curves on each side measure 4-5/8", providing flexible installation above a cabinet or on legs. This sink will become the focal point of any kitchen or pantry.

The new Artisan traditionally styled copper apron sink (left) creates a classic appearance. This highly functional single sink has 10" of depth and 4-1/4" return reveal curves for creative installations.

Handcrafted design of the highest quality coupled with functional elegance makes the two new Artisan Copper Sinks the ultimate choice for designers and homeowners. For more information, call 973-286-0080 or go to [www.artisansinks.com](http://www.artisansinks.com).
