## The Chef Pro™ Sink Collection

Artisan Manufacturing is pleased to introduce their new premium stainless steel Chef Pro Collection. Their traditional Apron Sink offers 10" of depth with an elegantly tapered, arched front panel ideally suited for installations where the interior styling and volume are important. Additionally, eight new undermount sinks are available. Both the Apron and Undermount models (pictured left) are available in a choice of single or double bowl styling.

With Artisan Sinks, the premium stainless steel finish simply can't be matched. The high-luster satin finish is durable, stylish and practical... portraying the latest trends in traditional kitchen and pantry design. All ten sinks in this new Collection offer a remarkable 16 gauge thickness, 304 commercial grade in 18/10 stainless steel. The superior craftsmanship provides long-lasting beauty, while offering resistance to both stains and corrosion. All under surfaces of these sinks are covered with their proprietary V-Therm Shield™, a dense coating that provides superior sound deadening and thermal retention qualities. These new Chef Pro Sinks deliver designer styling, desirable sizing, and best of all... are very affordable. For more information, call 973-286-0080 or go to [www.artisansinks.com](http://www.artisansinks.com).
